Game Ready® Accelerated Recovery System Innovative ACCEL Technology (Active Compression and Cold Exchange Loop) sets a new standard in recovery, synergistically combining active compression and cold therapies in a revolutionary treatment system that gives you the power to help patients heal. Compression and Cold Therapy working together like never before! * Active pneumatic compression mimics natural muscle contractions, helping the body pump oedema away while stimulating blood flow and oxygen delivery. * Rapidly circulating ice water actively removes heat and cools the tissue to reduce oedema, muscle spasms and pain. * Air pressure conforms wrap to the body for better surface contact, allowing the system to pull heat away from the injury site more efficiently and enhancing the effects of cold therapy. * Faster, deeper, longer-lasting intramuscular cooling slows cellular metabolism, helping the body to minimize secondary tissue damage - and less damage means faster recovery. Warranty: * Control Unit: 2 years from the date of purchase * Hose: 1 year from the date of purchase * Sleeve: In case of manufacturer's defect, sleeve may be returned within 7 days of purchase * Heat exchanger: 1 year from date of purchase
